

I oppose HR 4026. Please do not allow the NAB to dictate what "I" listen to on XM radio which "I" pay for. Radio is free and those who hold radio licenses are public servants as I understand the concept. "I" pay for XM so "I" should be able to hear anything they broadcast including vulgar language, weather reports, news, music, and frank discussions about current human issues. This is just another way to limit my rights to what "I" can hear or see on radio and TV. "I" enjoy being able to receive a traffic and weather report when "I" want it, not when some babbling talk radio pundit decides to shut his mouth long enough to air the traffic or weather. I hate all of the car commercials, fat burner commercials, and male enhancer commercials. "I" purchased an expensive radio for my vehicle and subscribed to XM so "I" could choose what "I" listened to. Please keep my satellite free from intervention by the all powerful NAB and their soft money contributions.
